Week ended July 18.

| | |
|---|-----|
| Vessels inspected..... | 15 |
| Bills of health issued..... | 19 |
| Members of crews of outgoing vessels inspected..... | 780 |
| Passengers of outgoing vessels inspected..... | 454 |
| Certificates of immunity issued..... | 30 |
| Certificates issued to passengers bound for New York..... | 237 |
| Certificates issued to passengers bound for southern ports..... | 106 |
| Vessels fumigated prior to sailing..... | 3 |

Sanitary conditions, Habana and vicinity, continue satisfactory. The health department reports 10,888 house inspections and a total of 26 deposits of mosquito larvæ, of which 8 were those of *Stegomyia*.

Reports from Daiquiri, Province of Santiago, show some improvement. During the week 7 cases of yellow fever were discharged recovered and 5 new cases registered, leaving 5 under treatment at the close of the week.

Every effort is being made by the authorities to limit the infection to Daiquiri. The measures employed include a census of the entire district and a daily roll call to insure proper surveillance and inspection.

July 28. The sanitary department announces 2 new cases of yellow fever with 1 death at Daiquiri.

Report from Matanzas—Inspection of vessels.

Acting Assistant Surgeon Nuñez reports, July 14:

Week ended July 11. Bills of health issued to 4 vessels clearing for United States ports in good sanitary condition.

Report from Santiago—Inspection of vessels—Water supply not satisfactory.

Acting Assistant Surgeon Wilson reports, July 14:

Week ended July 11. Bills of health issued to 3 vessels bound for the United States.

No quarantinable disease reported in the city during the week.

There has been much general complaint on account of the condition of the water served in the pipes. The water supply is from the new dam.

CURAÇAO.

Precautions taken to prevent introduction of plague.

Passed Assistant Surgeon Vogel reports, July 15:

The following precautions are being taken here to prevent the introduction of plague: All personnel of vessels arriving from Trinidad, Puerto Cabello, and La Guaira are detained to complete 10 days' detention from last exposure. The vessels are fumigated before being
